## the ultimate digital showering experience

Our Niagara<sup>®</sup> Digital Showering range is designed to make a bold statement in your bathroom. Innovative features provide precise control over your showering experience with simple controls, instant temperature adjustment, intuitive LCD digital display and illuminated LED lights. The entire range is thermostatically stable to ensure maximum safety and comfortable showering.

Explore our stylish modern and traditional shower valves that can be tailored to your showering needs.

# cutting edge features

Combining superior function and exquisite design engineering, our Niagara® digital range is intelligent showering at it's best. Packed with unique cutting edge features making showering highly responsive and convenient. Niagara® digital shower valves boast cool touch, easy divert and automatic safety shut down features. The latest technology allows outlet options and temperature to be changed simultaneously.

Niagara® digital shower valves can be installed both inside and outside of the showering area. Additional touches such as being able to operate prior to entering helps to create a luxurious showering experience.

## Safety First

Once you have selected your desired temperature it will remain unchanged through-out the duration of your shower, preventing risks of scalding or sudden temperature spikes.

## Cool Touch

Our sophisticated shower controls are kept completely separate from the water in the valve, ensuring they are always safe to touch.

## Easy to Use

We have meticulously considered each aspect of the showering experience to ensure our Niagara® digital shower valves make your routine effortless.

## Easy Divert

Niagara® digital shower valves have a diverter function for up to 4 outlets, providing the maximum showering flexibility. Changing between outlets is easy with icons clearly indicating your selection.

## WRAS Approved

Our Niagara® digital processor is WRAS approved, it has been tested and is fully compliant with the requirements of Water Supply Regulations and Scottish Byelaws.

## Control Dial

Flow is activated by pressing the Control Dial. Once the system is turned on, simply turn the dial to change to desired temperature. Coloured LED lights glow like a halo around the Control Dial to indicate the set temperature.

## LCD Digital Display

Our innovative easy to read digital display accurately outputs the precise temperature and selected outlet. Simple, clear and highly responsive.

## Automatic Safety Shut Down

If the water or power supply fails, the shower will turn off completely for your safety, enhanced safety feature gives you complete reassurance.

# intuitive illumination

Intuitive coloured LED lights change depending on the set temperature. This visual cue makes showering simple & safe, letting you know when the water is getting hotter and cooling down.

The control handle also features a stylish arrow indicator that not only shows the temperature position but acts as an aid during showering, providing greater control and ensuring each action is as seamless as possible.

0-25°C illuminates blue

25-40°C illuminates purple

40-45°C illuminates red

# design details

Our beautifully crafted Niagara® digital shower valves are available in two distinct trims: a simple yet attractive contemporary design and an intricate classic design with a bevelled edge. Choose your perfect style before completing your look with our set of co-ordinating shower accessories.

For ultimate control our Modern and Traditional kits can be installed in both landscape and portrait formats depending on your preference.

## deluxe

Whether your bathroom is modern or traditional, explore our deluxe range of showering accessories made from premium materials for an understated luxury.
