

INTRODUCTION

The model supplied may vary from the image shown. Please note that the general installation process for all Bath and Basin taps are the same and the following guide will take you through the process.

Before installation identify all components and inspect the product for any damage. A claim will not be accepted if an obvious defect is found after installation.

IMPORTANT

If you are unsure of any part of the instructions in this document then we recommend that you contact a reputable qualified trades person.

INSTALLATION

Prior to installation please ensure all supply pipes have been thoroughly flushed through to remove any debris. Isolating valves must be fitted in a convenient position to allow future servicing of the fitting.

1. Turn off the water supply and remove existing fittings.
2. Carefully assemble new fittings onto the bath/basin, ensuring the hot tap is positioned on the left hand side. Place washer between the backnut and bath/basin as shown above. [Figure A]
3. Tighten the fixing nut to secure the tap to bath/basin, do not overtighten as this may damage bath/basin.
4. Repeat this procedure for the cold tap on the right hand side of the bath/basin.
5. Earth any new pipework adequately. Seek the advice of a qualified trades person if in any doubt.
6. Connect water supply pipes. Note the hot water supply must connect to the left hand inlet when viewing from the front and the cold hand inlet to the right.
7. Once all connections are made, turn on the mains stop cock and allow the system to refill. Check connections for watertightness. Once happy there are no leaks you can switch on the water heating.
8. Finally, turn on water supply and allow to run for a few minutes to flush out the piping system thoroughly.

Guarantee

The Lifetime Guarantee is only valid to customers who complete and submit the online Niagara® Guarantee Registration Form within 30 days of installation. Please note that products with finishes other than Chrome are guaranteed for 3 years only, these products must also be registered online to activate the 3 Year Guarantee.

To register and activate your Guarantee please visit www.niagarabathrooms.co.uk

Aftercare

During installation, extra care must be taken to avoid damaging the fitting or it's finish.

To maintain the appearance of the fitting, please ensure it is cleaned regularly using a clean soft damp cloth only. Do not use abrasive sponges, scouring agents, organic solvents or acidic cleaners as they may cause surface deterioration.
